

Rapid Equipping Force Internship Program (REFIP)

The United States Army Rapid Equipping Force rapidly provides capabilities to Army forces employed globally through current and emerging technologies in order to improve operational effectiveness. Technology Management Mission: Provides science and technology analysis to the Director, Rapid Equipping Force, and collaborates technology searches and gathering with other Government agencies, academia, vendors, and foreign countries. Searches for current to near-term emerging technologies and collaborates their development to support Soldiers. Is the single point of entry for vendors to the REF, coordinating and assessing unsolicited technology proposals. Opportunities may exist for extended internships beyond the standard four weeks.

Location:

Cadets will serve at Fort Belvoir, VA.

Prerequisites:

1. Enrollment in any science or engineering academic major.
2. Interest in research and development or science and technology.
3. Possess a secret or higher clearance at time of application submission.
4. Maintain a Grade Point Average (GPA) of 3.0.
5. Meet current APFT and height/weight standards.
6. MS III Cadets have priority. However MS IV Cadets graduating December or later may apply as an exception to policy.
