

2025 WORLD OF WONDER

For students entering 1st grade
Students may take one, two or three classes.

8:00 a.m. – 10:00 a.m. Class 1101 (Rachel Nichols)

The Sweet Science of Chocolate

Embark on a deliciously fun journey into the world of chocolate with a class that integrates STEAM (Science, Technology, Engineering, Arts, and Math) principles into hands-on chocolate-themed activities. We'll explore the science of melting and solidifying chocolate with solar oven s'mores, experiment with temperature changes by making hot chocolate, and uncover the chemistry behind chocolate slime and play dough. Plus, we'll indulge in a sensory exploration through taste tests and even design our own chocolate bar with a personalized wrapper!

10:15 a.m. – 12:15 p.m. Class 1102 (Kennedy Pacey)

Wacky Wonders of Science

Are you ready to dive into a week of messy, exciting, and unforgettable science adventures? Join us for an action-packed week filled with hands-on experiments that will make your imagination run wild! Each day is a new adventure as we mix, smash, and create together! From explosive volcanoes and colorful slime to crazy rocket launches, we'll explore the wonderful world of science together. Get ready to splash, squish, and experiment your way through wacky projects that will leave us giggling and learning all week.

1:30 p.m. – 3:30 p.m. Class 1103 (Kennedy Pacey)

Beyond Cat in the Hat!

There is much more to Dr. Seuss than *Cat in the Hat*! Get excited about *Oh, the Places You'll Go* when we construct parachutes and mazes. Ask yourself, *If I Ran the Zoo*, what would your animals look like? With *Hop on Pop*, we will experiment with rhyme and how you can make a bouncy ball bouncy. Of course, we need to create Oobleck and maybe some other slimy solutions to make Bartholomew proud. Put your red and white striped hats on and, together, we will create, read, perform, draw, and experiment with all things Seuss.
